DATA SCIENTIST | DATA ANALYST

Analytical Data Analyst with 3+ years of experience in data analysis, visualisation, and statistical modelling, complemented by 8+ years in project and programme management. Holds a Master's in Data Science with hands-on experience in machine learning, NLP, and transformer-based models. Skilled at handling large datasets, delivering actionable insights, and producing high-quality MI reports and dashboards. Familiar with NHSBSA standards, including the Analytical Code Assurance Playbook, emphasising reproducible, quality-assured, and transparent analytics workflows.

EDUCATION

(M.Sc) Data Science

Northumbria University, Newcastle
2024

(B.Eng) Electrical/Electronic Eng

Federal University of Technology, Akure.
2012

SKILLS

- Python, R, SQL
- Advanced Excel knowledge (Pivot, VLOOKUP, PowerQuery)
- Advanced proficiency in data analysis and visualisation
- MI Reporting, Tableau, Power BI
- Scrum Methodologies
- Slack, Teams, Jira, Asana, Microsoft Project
- Data Analysis, Data Mining, Data Modelling
- ML Frameworks (TF, PyTorch) | Spark
- LLM | NLP | HuggingFace
- Statistical Techniques (includes A/B Testing)
- Project Management, Communication
- Workflow optimisation, process automation and improvement
- Trainings, Onboarding and Documentation

PROJECT

- Fact Extraction and Verification with BERT Using FAISS
- Breast Cancer Classification Using ML Models
- Stroke Risk Prediction Using ML Models

WORK EXPERIENCE

DATA ANALYST | MEDIABRIDGE LTD. (2024 – present)

- Developed dashboards and reports supporting business intelligence.
- Improved onboarding efficiency, reducing operational timelines.
- Delivered training programs, enhancing support resolution and customer satisfaction.
- Conducted A/B testing for product feature releases.
- Support trainings across the relevant services in relation to the appropriate usage of quality information.

DATA ANALYST - CONSULTING | TRIDUO TECH (2019 – 2024)

- Analysed team performance, streamlining workflows and increasing productivity.
- Developed SOPs and process enhancements from data-driven insights.
- Represented the organisation as a data consultant with external clients.
- Created automated workflows using Power Automate and Python for internal processes, reducing manual work hours.

SENIOR MANAGER, PROGRAMME PLANNING | CANAL+ / ROK (2019 – 2024)

- Led a critical software migration project, applying Scrum methodologies, Python scripting, and data validation techniques to ensure accuracy and continuity.
- Oversaw onboarding of internal teams, and developed operational documentation, SOPs, and training materials to streamline adoption and reduce recurring support requests for the migrated software.
- Provided remote support and advanced troubleshooting, minimising operational disruptions.
- Executed customer engagement programs that increased product penetration and reduced churn through targeted strategies.
- Managed end-of-year appraisals, performance reviews, disciplinarys, and authorised team expenses, ensuring effective team performance and accountability.
- Produced technical reports and actionable insights that informed risk management and decision-making across EMEA, North America, and APAC regions.
- Over five years, led a cross-functional team, fostering collaboration and improving efficiency across departments including content, production, marketing, and operations.

MANAGER, PROGRAMME PLANNING | IROKO TV (2015 – 2019)

- Managed cross-functional teams for customer success initiatives.
- Leveraged consumer data and feedback to refine workflows and engagement.
- Streamlined programming workflows using Digital Transformation and Scrum methodologies, improving scheduling efficiency by 200% and ensuring consistent content delivery.
